WEB DEVELOPER

Creative and critical thinker, an excellent team player

Who fully understands the importance of creating and maintaining websites and web applications that easily blend visual appeal with strong functionality. In this role, I offer a wide range of skill sets that includes expertise in essential programming languages like HTML, CSS, and JavaScript. I have an unwavering commitment to staying informed of the rapidly evolving web technologies and trends. My proficiency in both French and English enhances my communication abilities, facilitating effective collaboration within diverse teams.

With a solid background in front-end development, I possess the capability to design spontaneous user interfaces and elevate overall user experiences. Simultaneously, my proficiency in back-end development equips me to efficiently manage server-side operations, data, and databases, enabling me to create proficient web applications and implement content management systems. As my adaptability and continuous learning mindset empowers me to deliver innovative solutions.

Highlight of Expertise

- Web Technologies(HTML,CSS, JavaScript)
- JavaScript Framework(AngularJS)
- Frontend Frameworks(Bootstrap,Tailwind Css)
- CSS Preprocessors(Sass and LESS)
- RESTful Services & APIs(with PHP)
- JavaScript libraries(NodeJS,ThreeJS)
- Usage of cross-platform web servers(XAMPP)
- UI Testing and Debugging
- Database(MySQL)
- Blender(as beginner)
- Version Control Systems(GitHub)
- Erlang(as beginner)
- Application Dev(Flutter & Dart)
- Development of CMS

Work History

Imagistix Technologies, Pretoria, South Africa

Trainee as Web developer (March 2021 to present)

Tasks and Responsibilities:

- Designed and developed the company's website <https://imagistix.co.za/>.
- Designing and developing a Customer Relationship Management (CRM) software that empowered efficient management of user and client interactions. The CRM system included features for storing, organizing, and analyzing user data, presenting

insights through data visualization. It offered a user-friendly interface and effortless integration with other applications, enhancing the overall user experience.

- Designed and developed the health care clinic website <https://www.flourishwclinic.com/home>, which provides comprehensive information about the clinic's services and enabling online appointment scheduling. The website also features a wealth of educational resources and ensures mobile responsiveness for patient convenience. This particular approach ensures an effortless user experience, making important healthcare information and services readily accessible and reliable for all patients.

My Key projects

- Assisted in the creation of the user interface for the Momentum Metropolitan Holdings Ltd Guarantee Annuity Portfolio (GAP) project. This included the utilization of AngularJS to create user-friendly interfaces that enhanced the overall user experience. I diligently adhered to a precisely designed template provided by the project's UI/UX team, ensuring that the final product was not only easily understood but also aligned with the project's objectives.
- Designed and developed mobile apps using the Flutter framework. Which included creating user interfaces, handling app logic, integrating with various services and APIs, and ensuring that the app works smoothly on both Android and iOS platforms at Imagistix Technologies.

Education and Credentials

Pretoria Central High School (PCHS), Pretoria, South Africa, January 2021

HIGH SCHOOL (MATRIC) CERTIFICATE
